Dear Editor-in-Chief:

RE: Neuromuscular Partitioning of Gastrocnemius Based on Intramuscular Nerve Distribution Patterns: Implications for Injections

All authors have contributed to conception and design, analysis and interpretation of data, drafting the manuscript or revising it critically for important intellectual content. All authors have approved the final version of the manuscript for submission.

All authors, external and internal, had full access to all of the data in the study and take responsibility for the integrity of the data. All authors take responsibility for the accuracy of the data and its analysis.

All conflicts of interests for all the authors have been declared within the body of the manuscript. All authors do abide by the Association for Medical Ethics (AME) ethical rules of disclosure, including funding and sponsorships. Ethics committee approval has been obtained and the research was carried out according to the Declaration of Helsinki.

We also confirm that:
-This article is not being considered for publication in any form.
-This article was not previously published in any form or language.
-This article contains no unlawful statement and any materials that may violate the rights of any person or entity.
-This article does not breach copyright or any local or international laws (England & Wales).

Thank you for your consideration.
Sincerely,
ELDON LOH, MD, FRCPC
